

16A Compact Power Gateway for Smart Solutions, IT, Security and Electrical setups

The **16A Compact Power Gateway** is a unit created as an extremely compact accessory to meet the demanding needs of today’s smart solutions, IT, security and electrical setups of up to 3kVA.

In the event of a UPS maintenance or a power source upgrade, the compact Power Gateway is able to provide continuous service through the use of its maintenance bypass switch. With its quick transfer time, the UPS or power source can be isolated fast for maintenance without interruption to your critical equipment, thus making it easy to replace any UPS or power source.

With its Universal outlets, the 16A Compact Power Gateway is compatible with most electrical, IT and security devices. Its flexible configuration also provides the convenience of either horizontal or vertical development.

The **16A Compact Power Gateway** is reliable, compact, easy to install and use in today’s challenging and space-constrained work environments. It is also designed to work with most IT and security devices, UPS and electrical setup.

Technical Specifications *

Model Number	PGW16MUNIEC4	
Capacity	16A	
Input		Maintenance Switch
Voltage Range	220Vac to 240Vac	Switch (Manual)
Current Rating	16A	
Main Power (or Auxilliary Power Source)	1 x IEC C20	Physical
UPS Input	1 x IEC C19	Dimension in mm (W x H x D)
UPS Output (or Master Power Source)	1 x IEC C20	
Output		Net Weight in kg
Output	4 x UN (10A)	
		Environment
		Operating Humidity
		Operating Temperature
